Chief Executive Officer

DATE: April 24, 2008

RE: OREA's New Green Building – Parking Reduced

On April 30, construction will begin on the extension of our office at 99 Duncan Mill Road. Retrofitting an existing building will mean some inconvenience in the short term. On April 30, we will lose the parking area immediately behind our building. Visitors coming to OREA can use our rear parking lot; enter through 155 Lesmill Road. Signs and fencing will guide you around the construction to the main entrance. Parking for the handicapped and 20 Minute Visitors Parking will be strictly enforced. We will keep members informed of any changes as necessary through the REALTOR® EDGE, INSIDE EDGE and messages on the web site at www.orea.com. Visitors can check our web site and our outgoing voice mail message.

The new building will be registering as a LEED (Leadership in Environmental Engineering Design) building, which means we are making a commitment to minimizing our greenhouse gas emissions, waste, saving money on energy costs, and decreasing our impact on the environment. But most importantly we are making a commitment to our staff and volunteers to provide you with a healthier and better work environment.

This is good news for all of us as individuals and for us as an organization. In doing our part to protect the environment, we're helping to build a better world for all of our families and friends. Our hard work today will pay off with a cleaner, greener tomorrow.

A handwritten signature in black ink, appearing to read "Edward Barisa".
